

Re: Boat Central H Marina del Rey SPL-2014-00307 (UNCLASSIFIED)

## We Need A Public Hearing by the Army Corps of Engineers on Boat Central

**This project has plenty of controversial impacts that have not been adequately addressed:**

- Disruption of public launch ramp adjacent to site
- Structures over water and how it sets a precedent.
- Analysis of alternative sites within the marina
- Other recreational uses for this site
- Reduction of views and pedestrian walkways
- Protection of Native American cultural resources
- Impacts to the culvert that runs between the marina and the La Ballona Wetlands
- Water quality impacts due to boats (washing, run-off, etc.)
- Shade/shadow/wind impacts on biological resources and boaters
- Environmentally Sensitive Habitat Area - roosting and nesting birds (noise levels)
- Adherence to Coastal Zone Management Act goals and policies
- Public access to shoreline
- Cumulative demand for parking for coastal access
- Adherence to NEPA, Public Law 780 and HD 389 goals and policies.

I want an Army Corps of Engineers public hearing on the Boat Central Project in Marina del Rey.
